

0625-PHYSICS-IGCSE ELECTRICITY

CONDUCTORS-INSULATORS-SET-1

1	<p>How many of the following materials conduct electricity?</p> <p>aluminium silver iron plastic</p> <p>A 1 B 2 C 3 D 4</p>
MS-1	C
2	<p>Which group contains only good electrical conductors?</p> <p>A air, carbon (graphite), plastic B air, gold, mercury C carbon (graphite), copper, mercury D copper, gold, plastic</p>
MS-2	C

3	<p>A student tests the electrical conduction of four materials.</p> <p>aluminium</p> <p>iron</p> <p>plastic</p> <p>silver</p> <p>Which materials conduct electricity?</p> <p>A aluminium, iron and silver only</p> <p>B aluminium and silver only</p> <p>C iron, silver and plastic only</p> <p>D plastic only</p>
MS-3	A
4	<p>Which material is a conductor of electricity?</p> <p>A brass</p> <p>B glass</p> <p>C plastic</p> <p>D wood</p>
MS-4	A
